George Priest, DMD

"Interdisciplinary Care to Gain Optimal Esthetics and Function"

Friday, October 7, 2016
8:00 AM to 4:00 PM
DoubleTree Hotel of Plymouth Meeting
640 Fountain Road, Plymouth Meeting, PA 19462

This all-encompassing course enables you and your entire staff to raise the level of care you provide to your patients. Learning to efficiently and effectively use time and progressive materials will allow clinicians to better achieve the goals of esthetic smiles while preserving tooth structure.

The essential principles of functionality; color, contour, and proportions, followed closely by esthetics, smile design, and jaw relations. Exploring implant restorations beyond hard tissue esthetics and including responsibility of soft tissue. Encompassing the necessary collaboration of restorative dentist, implant surgeon, periodontist, and oral surgeon. Includes step-by-step clinical examples and videos.

Crown and veneer preparation and impression techniques
- Retraction and impression, whether digital or conventional
- Scripted digital imagining for proper color, contour, and proportions
- Calculating ideal tooth dimensions
- Simplifying the process of crown and veneer restorations
- Soft tissue management
- Practice management

Earn 6 CE credits

This presentation will benefit dentists and their entire staff.
